

Stratford Garden Centre

📍 Stratford-upon-Avon, UK

☰ Quantum SGL,
Vepps SGL &
Solid Surface
Washtrough

The project.

Located close to Stratford-upon-Avon, Stratford Garden Centre also features a small but vibrant shopping village and restaurant. The garden centre recently underwent a large extension and as part of this project decided to undergo a complete refurbishment of their toilet facilities, replacing and modernising the female, male and accessible toilets.

The solution.

Venesta's Quantum toilet cubicles have a modern floating appearance for a sleek commercial washroom design. Designed with maximum flexibility in mind, the toilet cubicles are available in an array of colours and finishes, making them a popular choice for many.

The Quantum toilet cubicles at Stratford Garden Centre feature our unique emergency release indicator bolts for easy and safe access in the event of an emergency, and have a sculpted headrail design in satin anodised aluminium for strength and rigidity. The cubicles were specified in 'Weathered Grey' wood effect Solid Grade Laminate (SGL), complemented by pilasters and partitions in 'Suede'. SGL is extremely robust and waterproof so is an ideal material choice for high footfall areas such as retail and other public facilities.

For a seamless design throughout each of the washrooms our pre-plumbed panelling system Vepps was specified in SGL in complementing 'Weathered Grey'. Vepps offered a quick and easy installation as all the sanitaryware, including the toilets, urinals and panel mounted basins, were pre-plumbed and fully tested off-site. A bespoke solid surface washtrough was specified for the male toilets to specifically suit the smaller space that was available.

A separate accessible toilet facility features Vepps SGL panelling, housing the pre-plumbed and tested toilets with accompanying backrest and grab rails.
