See p24-25 for Unity technical specifications.

Key features
Minimal look with clean lines
Flush fronted with a floating appearance
Satin anodised aluminium and stainless steel fittings
Full height and increased privacy options available
Choose from 34 standard laminate colours or 10 RAL finishes for ultimate design flexibility
Optional choice of black, brass or bronze effect cubicle hardware for ultimate design flexibility

Case Study Capital One Head Office

Capital One recently turned their attention to breathing new life into their washrooms to give their staff the very best facilities throughout their office.

Capital One's previous washrooms were dated and in need of a complete overhaul. We were pleased to work alongside Nottingham-based contractors Rotunda Construction to bring Capital One's employees new stylish, modern and easy to maintain washrooms.

Our Unity toilet cubicles were specified in all six of the new washroom areas at Capital One. With setback satin anodised aluminium pedestals fixed to the partitions, Unity has a floating appearance which makes a huge impact in these modern washrooms.

The cubicles were specified in Solid Grade Laminate (SGL) which is an impact and scratch resistant material so will withstand heavy usage in Capital One's busy office. SGL is impervious to water, meaning the cubicles can be regularly cleaned, so that excellent hygiene standards are maintained.

Capital One had a choice of 34 laminate finishes for their Unity toilet cubicles, and opted for our luxurious wood effect 'Dark Walnut' laminate, which complemented the décor of the rest of the rooms.

The minimally designed, flush-fronted cubicles feature sleek satin anodised aluminium flip indicator bolts, faceplates and internal mortice locks, which complement the contemporary design of the cubicles. The indicator bolts offer a cleverly designed emergency release mechanism, so access to locked cubicles can be gained without causing damage to the lock or having to remove the door in the event of an emergency.

Performance

Available in four material options, Unity is suitable for every type of wet or dry environment, allowing you to specify the most appropriate option to meet the site requirements and your budget.

HPL

For more heavily used washrooms, panels are heat, scratch, impact and cigarette burn resistant. Moisture-resistant chipboard faced with high pressure laminate. Edges lipped with ABS. Doors and pilasters are 35mm nominal thickness with an MDF core, partitions are 19mm nominal thickness.

SGL

Solid grade laminate is extremely resistant to impact and all surfaces are impervious to water. Panels are 13mm nominal thickness with polished black radiused edges.

ColourCoat

Panels have an MDF core. Doors and pilasters are sprayed with a coat of primer and finished with 20% gloss pigmented lacquer. Doors and pilasters are 35mm nominal thickness, partitions are 18mm nominal thickness.

ColourCoat High Gloss

Panels have an MDF core. Doors and pilasters are sprayed with a coat of primer and finished with 80% gloss pigmented lacquer. Doors and pilasters are 35mm nominal thickness, partitions are 18mm nominal thickness.

Detailing

Panels and doors
