Sleek, ultra-modern full height toilet cubicles guarantee user privacy

The project.

Sharjah Central is a newly developed two storey retail and leisure destination, offering an enriching shopping experience to the local community in Sharjah, United Arab Emirates.

Boasting a wide selection of shops, restaurants, a 10,000 square metre hypermarket and an extensive entertainment complex with multi-screen cinema, Sharjah Central's mission is to be the ultimate leisure destination for families and entertainment seekers.

The challenge.

Located just a stone's throw away from both Sharjah International Airport and Sharjah University City, footfall at Sharjah Central was expected to be high and steady. As is typical in the United Arab Emirates, style is of paramount importance, so the design of the toilet cubicles could not be compromised by the need for durability.

The privacy of these busy washrooms was equally as important so that safe, comfortable and secure facilities were available to all visitors. With this in mind, Abu Dhabi based management company Lulu Group International and architects Design International worked with the Venesta team to identify and specify a premium cubicle system that would offer visitors privacy and could stand the test of time too.

The solution.

Our premium Infinite Full Height toilet cubicles were specified in heat, scratch and impact resistant High Pressure Laminate (HPL), which is an ideal material for heavily used areas.

The ultimate in classic modernity, Infinite Full Height toilet cubicles deliver sleek, clean lines, flush-fronts and minimalist fittings. 'Cloud' and 'Gunmetal' were the colours of choice for the cubicles, complementing the décor of the modern washrooms perfectly.

The cubicle partitions and pilasters were fixed to the floor and ceiling with fixing blocks for style and rigidity in equal measure. Meanwhile, the ceiling to floor cubicles and 20mm door clearances would guarantee total user privacy.

Our premium toilet cubicle range, Infinite, boasts sleek stainless steel lever operated indicator bolts that offer quick emergency release from outside of locked cubicles. This means no damage is done to the cubicles or locks in the event of an emergency, which is a key consideration when specifying commercial washrooms in busy settings.

We're thrilled to learn how well received the 59 Infinite Full Height toilet cubicles have been by visitors to Sharjah Central Mall. Infinite is a contemporary, high quality solution, perfect for the most stylish washroom environments. The luxurious cubicles have certainly met the high expectations of modern architecture and design in UAE.

Please note, Venesta Washroom's Infinite toilet cubicles have been updated since this installation and now feature new indicator bolts, hinges and pedestals.
